

DU VERRE HARDWARE INTRODUCES
THE RISE COLLECTION BY CHRISTOPHER SMITH

PRESS RELEASE

"Opening and closing doors and drawers are decisive, sweeping gestures. Each piece in the **RISE** Collection adds a singular swept arc across the surface on which it is mounted. But no piece should add to the visual clutter of a space. The collection is intended to be clean, trim, and assertive." – Chris Smith

This great new collection from Du Verre is modern and sleek with a slightly retro feel. RISE by Chris Smith is die cast for the ultimate in precision and clean design.

Industrial designer Christopher Smith (www.eastmaindesign.com) provides design services for projects ranging from trade show exhibits and packaging, to furniture collections and consumer products. He is founding partner and Design Director for Blackbird (www.blkbrd.com), a manufacturer of premium residential lighting products.

Made of recycled aluminum RISE is environmentally friendly, maintaining Du Verre's standard of making beautiful objects for a truly beautiful world. Pulls are available in five sizes and two finishes- Matte Black (BM) and Satin Nickel (SN).

Please join us at the following trade shows to see RISE and the rest of our original hardware collections in person. For more information, to receive catalogues, hi-res images, quotes and samples please contact us through our website www.duverre.com or email us at orderdesk@duverre.com.
