

DU VERRE DESIGNER FEATURE

GINA LUBIN

FOUNDING PARTNER AND DESIGNER AT DU VERRE HARDWARE. Lubin focuses on simplicity and originality to create a legacy of classic pieces for enjoyment of the everyday.

Du Verre's designer-inspired lines feature a variety of options for adding texture almost instantly to any interior, fine cabinetry or important door. World traveler Gina Lubin, Du Verre's founding partner and one of the company's designers, brings home colors, light, shadow and textures from across the globe and incorporates them seamlessly into Du Verre's distinctive designs.

Her Rio collection plays with texture and lines. Inspired by ancient ruins and symbols, Rio's patterns have an air of mystery and a one-of-a-kind feeling. Rio knobs and pulls are as much art as a functional piece of design.

Her focus on detail and texture combined with perfect function reflect her philosophy of simplicity; "Form, function,

quality and originality - with these ingredients you can create a sustainable and beautiful environment. Wellness, balance and harmony are the wonderful byproducts of good design. Through quality comes pleasure and peace of mind. Well made objects support the shared goals of sustainability. It all fits together quite naturally"

In each of her Du Verre designs, she aspires to create "a harmonious whole". Through their collaboration with an outstanding roster of award-winning designers and artists, Du Verre has raised the bar on innovative hardware design and the sustainable use of materials. Thanks to progressive manufacturing methods, each piece of hardware is crafted in eco-friendly recycled aluminum that is fully compatible with LEED objectives.
